THE COMPANY

Eductrade is a company specialising in the integrated development of projects in the areas of health, education and other social sectors.

“A commitment that goes **the extra mile**, guarantees our customers’ satisfaction and ensures a positive impact on society”.

Eductrade is a company specialising in the integrated development of social infrastructure projects in the areas of healthcare, education and energy and water management.

The company was founded with a vocation for international expansion and it has been operating in the market for over 40 years.

Committed to the well-being of society, the organisation focuses on projects that generate value and have a high social impact throughout the 39 countries where it has worked. This impact is reflected in the 13 million people who have benefited from health centre decentralisation projects; at hospitals, with over 30,000 beds and 268 medical departments; or in the more than 3 million students who have benefited over the past 15 years.

When it came to assessing Eductrade's business management with a view to awarding the Madrid Excelente quality seal, the organisation's firm commitment to developing countries and challenging markets; its ethical code and commitment to the environment; and the good rating received from its clients for its services were all taken into account.

All this led to it being included among the certified companies, embarking on a new challenge: ongoing improvement.

The UN's 2030 Agenda for Sustainable Development set out 17 goals linked to sustainability, and Eductrade is currently working on projects that coincide with six of these Sustainable Development Goals (SDGs):

GOAL 3: GOOD HEALTH AND WELL-BEING

Construction and equipment for eight hospitals in South and Central America.

GOAL 4: QUALITY EDUCATION

We have been developing projects focusing on education since 1976. We built two universities in Ecuador in 2021.

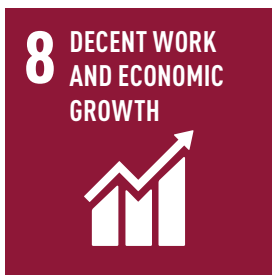

GOAL 5: GENDER EQUALITY

In 2022, Eductrade signed its first Gender Equality Plan.

GOAL 6: CLEAN WATER AND SANITATION

Developing water management projects in Nicaragua in 2022.

GOAL 8: DECENT WORK AND ECONOMIC GROWTH

In 2022, Eductrade is developing a technical project to raise the attendance and enrolment rates in secondary education in Turkey.

GOAL 13: CLIMATE ACTION

Eductrade has the Environmental Management System Certificate (ISO 14001) and the Energy Management System Certificate (ISO 50001).

“We seek company growth with a committed and enthusiastic team, and our objective is to develop projects that generate value with great social impact”.

Francisco J. Mozos
Managing Director

“We transfer technology
and know-how”.

We work in sectors with a
strong social dimension.

We offer our clients **solutions adapted** to their needs, applying advanced technology and our proven experience to guarantee the quality of all our projects.

In addition, the ability to structure project financing is one of the cornerstones of Eductrade's value proposition.

THE COMPANY
HISTORY

“Over 40 years contributing
to **social progress**”.

1976

THE BEGINNINGS

Eductrade is founded with a vocation for development in the area of Education.

1985

HEALTH

First projects in the Health sector.

1999

TECHNICAL TRAINING

Comprehensive design of technical training.

2004

OTHER SECTORS

Agriculture, environment, renewable energies and new technologies.

2007

TURNKEY PROJECTS

Integration of infrastructure, equipment and services components into projects.

2012

FIRST ADMINISTRATIVE HOSPITAL CONCESSION

Comprehensive project at the High Specialty Regional Hospital of Ixtapaluca.

2018

RENEWAL OF THE COMPANY

New stage as an independent company with new resources and a cutting-edge approach to guarantee the success of the projects.

2022

WATER AND ENERGY

Creation of the new Water and Energy division.

FUTURE

WE ARE HELPING TO BUILD A SUSTAINABLE FUTURE

Economic, sustainable and social balance of the projects.

“Our long-standing track record is supported by the development of projects in different sectors”.

268

Medical
departments

We develop projects that incorporate attractive solutions in the area of health, with the aim of improving the quality of care to citizens and promoting universal access to health care for the population.

- Development of hospital projects.
- Economic and financial analysis of projects.
- Evaluation and comparison of equipment investments.
- Technological evaluation.
- Supply of medical equipment, instruments and clinical and administrative furniture.
- Calibration and commissioning of equipment.
- Training and skill building.
- Maintenance and replacement of equipment.

Guatemala - 2023

Chiquimula Hospital Chiquimula

Equipment

Construction

Turnkey

Improving skills

In 2022 Eductrade was awarded the International Public Tender for the turnkey contract of the Chiquimula Hospital in Guatemala.

This contract encompasses the design, construction, equipment and commissioning for the improvement and/or expansion of the hospital located in the town of Chiquimula. The contract is for a total sum of:

Eductrade has been contracted by the Ministry of Public Health and Social Assistance (MSPAS).

- 200 beds
- 5 operating theatres
- 4 delivery rooms

This hospital in Chiquimula comes in addition to the 10 previous projects in the area of health that the company has been developing over the last two years.

► **EUR 33.64 million**

Argentina - 2023

New Maternity Hospital Córdoba

Equipment

Construction

Training

Turnkey

Engineering

Sustainability

Construction and equipment project under a turnkey contract.

Newly built hospital with a surface area of 13,700 m² that will serve a population of 600,000 inhabitants.

More than 2,500 surgeries can be performed each year.

- 5 operating theatres, 10 delivery units.
- 130 inpatient beds, neonatal intensive care.
- 100 incubators, neonatal intermediate care, 10-bed adult intensive care.
- 60 outpatient clinics.

▷ EUR 30.6 million

Villa Dolores Regional Hospital Córdoba

Ecuador - 2021

Equipment for Technical University Ambato

Equipment

Training

The project aims to strengthen the institution, particularly the laboratory of the Food Technology Research Operational Unit, both in terms of the provision of educational resources and the management and technical-pedagogical skills of its staff.

▷ **USD 441 thousand**

- Provision of equipment and related services: supply, installation, commissioning and operational testing of equipment.
- Training: delivery of a programme of on-site training courses at the beneficiary laboratory of the project, given by expert trainers, with theoretical and practical content on the characteristics, calibration, operation, application, maintenance and troubleshooting of the equipment supplied.
- After-sales assistance: preventive and corrective maintenance and warranty service. Technical support during pre-established opening hours for the monitoring and management of equipment maintenance.

Ecuador - 2021

Equipment for University Cuenca

Equipment

Training

The main line of action consists of strengthening the institution, especially two of its laboratories, both in terms of the provision of educational resources and the management and technical-pedagogical skills of its staff.

► **USD 894 thousand**

- Providing specialised equipment to the centre's laboratories.
- Laboratory: PV microgeneration kits, three-phase power converters, optimisers for solar photovoltaic panels...
- Bioenergy laboratory: 5L lab-scale reactor, methane potential test system, anaerobic bioreactor simulator for continuous processes, gas measurement equipment...
- Programme of on-site training courses in the project's beneficiary laboratories, given by expert trainers.
- Provide technical support and maintenance for the equipment supplied during the period of the technical warranty.

INFRASTRUCTURE PROJECTS
WATER AND ENERGY

“We transfer technology
and know-how”.

We provide solutions for the complete water cycle and develop water infrastructure projects. We develop energy infrastructures that generate energy from renewable and conventional sources, as well as transporting and distributing energy.

Water sector projects

- Desalination.
- Purification.
- Waste water.
- Reuse.
- Industrial waters.
- Operation and maintenance.
- Pipelines and auxiliary works.
- Consultancy.

Energy sector projects

- Conventional generation.
- Renewable energy.
- Energy storage.
- Hydrogen production and power generation.
- Energy recovery from waste and biomass.
- Consultancy.

Mexico - ongoing

Manzanillo III Combined Cycle Power Plant Colima

Construction

The project includes the construction of the technical buildings, foundations for auxiliary equipment and the seawater intake works.

It is a joint venture with Ingeniería y Proyectos Tyson, S.A. de C.V. The company Harbin Electric International Company, Ltd. is currently constructing this project for the Federal Electricity Commission (CFE).

▷ **EUR 15.18 million**

The Manuel Álvarez Moreno Thermoelectric complex has 7% of the CFE's effective capacity, making it the largest complex in the country.

- Construction of TG Gas Conditioning (21 x 22).
- Foundation Pump Room PCI.
- Pump room.
- Chemical Drainage and HDPE chemical drainage ducts.
- External structures in chemical water zone.
- Neutralisation well.
- Potable water, industrial fire-fighting and condensate tanks.

Nicaragua - 2022

Refurbishment, improvement and extension of drinking water system Jinotepe

Turnkey

Sustainability

The drinking water system in the city of Jinotepe will supply a population of 55,000 inhabitants.

This is Eductrade's first project in the Water and Energy sector. This is an International Public Tender, in a single-stage, one-envelope process, developed in the Nicaraguan city of Jinotepe.

- 14 pumping stations with 14 wells.
- 4 centrifugal pumps, functioning as re-pumping stations.
- 13 impulse lines, spanning 15.13 km in total.
- Storage tanks in the West, North and South Zones, with total capacity of 7,258 cubic metres.
- Distribution network of 58.2 km.
- 1,513 new household connections and 2,962 meter replacements.

► EUR 16.9 million

“Projects with an impact and great social engagement”.

Social footprint

Certifications in
dendro power

Care for the environment is an integral part of the development of each of Eductrade's projects.

Eductrade develops projects in unconventional sectors, acting on its own or in multidisciplinary collaboration with companies specialised in different areas in relation to:

- Training and skill building.
- Renewable energy.
- Agriculture and livestock.

Cuatro Caminos Municipal Sports Centre Madrid

Concession

Construction

Design

Equipment

Financing

Maintenance

The project is a works concession from Madrid City Council, which includes the design, financing, construction and operation of the centre. The term of the contract is for 24 years.

It is part of the Madrid Capital 21 Equipment Plan for the period 2019-2027, and the and of the beautification and urban improvement plan for the Tetuán District of Madrid.

- Capacity for around 8,000 users, who will have access to extensive facilities to carry out all kinds of activities: multi-purpose halls, swimming pool, physiotherapy, sports medicine, catering...
- Eco-friendly, industrialised systems that will improve environmental performance with innovative infrastructure and the implementation of a resilient response model for harnessing the maximum solar energy, as well as storage, recycling and energy consumption measures.

▷ EUR 107.6 million

Spain - 2020

Antonio Díaz Miguel and Las Cruces Municipal Sports Centres Madrid

Management

Projects contracted by the Joint Venture include the provision of the management and operation services of the Sports Centres.

Management and operation of the facilities.

- Coordination and monitoring of the maintenance of the sports facilities.
- Attention and information to the public on all the services provided at the Sports Centre.
- Recruitment and management of personnel necessary for the provision of all the services of the Sports Centre and its suitability for use.

Antonio Díaz Miguel MSC

CONSULTING / TRAINING / SKILL BUILDING

We implement advisory, technical assistance and consultancy services to governments and institutions in developing countries, aimed at supporting and strengthening their policies, strategies and service provision.

HEALTH

Primary care.

Hospital and specialised assistance.

Training of health care personnel.

Health economics and system financing.

Healthcare information systems.

Technical and medical audits.

EDUCATION

Reform and institutional strengthening of the education system.

Coordination of the education system with the labour market.

Design, organisation and management of training centres.

Scientific and technical updating for teachers.

Quality management and assurance systems.

Management of educational programme concessions.

OTHER SECTORS

Renewal of HR.

Improvement of Job training systems for employment.

Design of career plans and employment pathways.

Development of training materials associated with professional profiles.

Design of online courses.

Digitalisation of educational content.

Technical assistance in town twinning between Turkey and the EU

Phase I - Twinning for a green future

Consultancy

The main goal is to improve dialogue between the local Turkey authorities and the EU, and to strengthen their capabilities to carry out climate and environmental actions.

▷ **EUR 1.5 million**

Sustainability

- Increase the quantity and quality of town twinnings with green future themes.
- Enhance the capabilities of key institutions in subsidy monitoring, reporting and implementation.
- Increase the visibility of the Programme at the national and international level.
- Improve the capabilities of key institutions and local authorities regarding the green future, sustainable town planning and chapter 27 of the EU Acquis.
- Prepare and publish a roadmap for the financing of the fight against climate change.
- Increase communication between local Turkish authorities and the EU.

Tajikistan - Ongoing

Technical assistance to education and labour sectors Dushanbe

Training

Institutional support

The project's main aim is to improve the learning outcomes and employability of young Tajikistanis, with a special focus on those in vulnerable situations.

The project, contracted by the Delegation of the European Union to Tajikistan, started in October 2022 and will last for five years (60 months).

This will be achieved by:

- Strengthening the quality and relevance of skills-based general secondary education and vocational education and training to the needs of learners and the labour market.
- Improving the Labour Market Information System, which connects skills supply and demand and serves as a basis for skills development and matching policies.
- Improving education sector governance in terms of new financing schemes, strengthened policy development, monitoring and evaluation capacity, and coordination with stakeholders.

► EUR 8.13 million

Morocco - 2021

Ministry of Health Rabat

Policies

Improving skills

Financing

Strengthen the population's equal access to quality health services, from a universal access perspective.

Support for the implementation of advanced regionalisation and hospital reform and financing of the public hospital network.

► **EUR 3.2 million**

- Technical assistance in the medium term to support the improvement of services for users and improve personnel training.
- Contribute to reinforcing information, education and communication activities.
- Provide technical assistance for gender matters and public-private partnerships.
- Optimise the workload of personnel at health centres.
- Study on access to essential and generic medicines.
- Study on user satisfaction and implementation of a device for measuring citizens' expectations.

Lesotho - 2021

Supporting economic diversification

Project to support economic diversification and implementation of the learning strategy, funded by the African Development Bank. The country's Ministry of Education and Training is the beneficiary of the intervention.

The aim of the project is to support the development of the private sector through improved association, entrepreneurship and skills development, access to financing and the market, and the promotion of investment in selected sectors that are key to economic diversification.

In particular, Eductrade assists the tripartite organisation of Lesotho to establish a dual study programme whereby graduates of higher education institutions are sufficiently exposed to industry and business practices to satisfy the needs of the market and/or can enter into self-employment or business with relative ease.

Furthermore, the consultant is expected to develop clear guidelines to improve the effectiveness of the tripartite organisation to oversee the implementation of the dual study programme.

▷ USD 216.5 thousand

Ministry of Employment Employment Training Service

Improving skills

Financing

Policies

Audit

Employment

Design a new conceptual and organisational model for the Youth Employment Training Service, with mechanisms of coordination with companies to promote their active participation in the training modalities that require it.

Operational design of the training service that establishes the guidelines for its operation.

- Develop a conceptual and operational model integrated into the employment centre.
- Design a monitoring and supervision system for the employment training model.
- Define a programme for the vocational trainer.
- Define a mentoring programme for selection, training and evaluation.
- Drawing up criteria for identifying companies.
- Define strategies for linking with companies for labour market integration.

▷ USD 908.2 thousand

Spain - 2020

Ministry of Education

Consultancy

Equipment

Training

Innovation

Improving skills

Policies

Multi-year administrative concession for the management of public services of the Ministry of Education.

That's English! is an educational programme aimed at teaching English in the distance learning format in which approximately 25,000 students currently participate, distributed across around 100 Official Language Schools belonging to 14 Autonomous Communities.

- Design and development of the in-house app with new content.
- Training of teachers/tutors.
- Custom technological development and maintenance of the learning platform (LMS).
- Editing, printing, publication and integration of teaching materials on the platform.

▷ EUR 20.0 million

CORPORATE SOCIAL POLICY

CONTINUOUS IMPROVEMENT

Our increased level of commitment is also reflected in the award of leading certificates in the areas of **quality systems, compliance, environmental management systems** and **energy efficiency**.

“UNE - ISO 9001 Quality Management System”.

“Eductrade is one of the first companies in Spain to have the **UNE-ISO 37001 Anti-bribery Management System certification**”.

We follow a policy of zero tolerance towards any form of corruption. To this end, we abide by principles of action and rules of conduct that are observed by all employees.

UNE-EN ISO 14001 and 50001. Certifications for **Environmental and Energy Management Systems.**

GA-2019/0235

GE-2019/0033

SI-0089/2021

Information Security Management System in accordance with the standard **UNE - EN ISO/IEC 27001:2017**

We are committed to the environment, carrying out continuous assessment, including pollution prevention, control of consumption, waste, emissions and discharges, and promoting awareness and participation.

We optimise the consumption of energy, identifying, evaluating and managing the consumption and use of energy arising from activities in order to minimise it.
